

accuracy defined

ELEY's .22LR ammunition has been used to win more Olympic medals than all other .22LR brands combined. We are one of the world's oldest ammunition manufacturers, and our products and services have been the benchmark for quality since 1828.

ELEY only manufactures .22LR cartridges and air pellets. Our research, development and experience goes into producing the most accurate ammunition in the world, establishing our status as the world leader in ballistic engineering.

ELEY's headquarters are based in the UK. The world's finest engineers use state-of-the-art machinery and advanced analytical processes to redefine accuracy.

In 1979, ELEY developed the world's first and only dry priming system, ELEY prime. This remains the most consistent method available, increasing the accuracy of every round and serving as the industry's safest priming process.

King George V visited ELEY's UK factory in 1915.

ELEY have won more major medals than all other .22LR brands combined.

ELEY ammunition testing

Improve your competition confidence and batch test your ammunition at any of ELEY's five worldwide test ranges. Our unique testing methodology, electronic targets, custom-built equipment and software ensure every shot counts.

The testing process takes three hours, during which 40 shots will be fired from up to 20 batches to compare their performance. Our proprietary software uses individual shot data to statistically analyse the performance of each batch and provide the greatest possible assessment of accuracy.

ELEY's five ranges are based in the UK, Germany, Norway and USA (Texas). Norway hosts a special cold test range which is optimised for biathlon testing. Visit www.eley.co.uk/test-ranges to find out more and book your appointment with one of our range officers.

ELEY tenex challenge

We are so confident that our ammunition is the most consistently accurate in the world that we'll prove it to anyone who would like to take up the challenge. Bring your best batch of non-ELEY ammunition to one of our customer ranges. If we cannot outperform your batch of ammunition we will give you 5000 rounds of barrel selected ELEY tenex for free.

40gr flat nose

ELEY tenex is the world's premier competition cartridge. It is the most accurate and successful .22LR cartridge ever developed and the choice of the world's best shooters since 1951.

Investment and continuous technological advances led to the patented flat nose bullet profile. This revolutionary feature aerodynamically stabilises the projectile for increased accuracy.

edge

40gr flat nose

ELEY edge was originally designed for high-level training and has since found popularity with competitive shooters.

ELEY edge introduces the patented black oxidised case which improves accuracy by modulating the release force between case and bullet for a more consistent burn and flight.

match 40gr flat nose

ELEY match shares technology with ELEY tenex including the flat nose bullet and the cut mouth case for enhanced ballistic characteristics.

Produced on a dedicated line with a suite of analytical processes to ensure match-winning performance.

ELEY tenex is the world's premier competition cartridge. The choice of the best shooters since 1951.

ELEY sport introduces competitive shooters to the world of ELEY's accuracy and consistency.

Small lot quantities and statistical process control techniques ensure reliable performance in every round.

ELEY club our mid-range competitive target cartridge that utilises the benefits of the round nose bullet profile.

Enhanced performance with outstanding accuracy.

tenex pistol

40_{gr} round nose

ELEY tenex pistol is the result of years of comprehensive research and development into ballistics, cycling, bullet profiles, case construction and bullet composition.

The propellant is designed specifically to provide an equal amount of energy to each bullet, improving accuracy and helping control recoil.

match pistol

40gr round nose

ELEY match pistol offers competitive performance, aided by the round nose bullet profile which improves feeding and extraction for smooth cycling.

Extensive testing and measuring is undertaken by our skilled engineers to minimise variation between each batch.

tenex slow pistol

40gr round nose

ELEY tenex slow pistol features a reduced charge of propellant for lower velocity, leading to increased consistency of recoil and feel.

ELEY's complete range of analytical tools assess each round to ensure the highest possible performance demanded by the world's elite.

40_{gr} round nose

ELEY match slow pistol improves control and sight-picture recovery with a specially designed propellant which burns faster to ensure reliable performance for every shot.

The cartridges are uniformly constructed using leading techniques and equipment, including computer controlled visual inspection and the world's most accurate measuring tools.

tenex biathlon

40gr flat nose

ELEY tenex biathlon was launched following extensive research and testing, leading to a new lubricant designed for low temperatures and an increased propellant charge for the biathlon target.

A redesigned flat nose bullet with a reduced diameter was developed for consistent chambering in adverse conditions.

match biathlon

40gr flat nose

ELEY match biathlon is a highly accurate cartridge used for training and competing at the highest levels.

ELEY's patented flat nose profile pulls the center of pressure forward to offer increased stability.

tenex slow biathlon

40_{gr} flat nose

ELEY tenex slow biathlon features a reduced charge of propellant for lower velocity, combined with ELEY's new adverse weather lubricant this cartridge produces outstanding performance at low temperatures.

A patented flat nose bullet with a reduced diameter for consistent chambering.

The ELEY sponsored French Biathlon Team won 50 major medals in the 2016/2017 season.

high velocity hollow

38gr 1130-1250fps hollow point

ELEY high velocity hollow is the first black oxidised .22LR hunting cartridge. ELEY's engineers discovered that the oxidisation process optimises the contact point between case and bullet for greater internal ballistic consistency and a proven increase in precision.

The increased propellant pushes velocity up to 1250fps for exceptional ballistic performance without compromising accuracy.

Available in a 300 round rec pak.

subsonic hollow

38gr 1040-1090fps hollow point

One of the quietest hunting rounds available, with a non-greasy lubricant for smooth operation in all weather conditions.

Available in a 300 round rec pak.

force

42gr 1130-1250fps round nose

ELEY force utilises a modified propellant with a distributed power curve for supersonic velocity in semi-automatic firearms.

The heavier 42-grain bullet and the matt-black oxidised case combine to produce superior energy and accuracy.

Available in a 300 round rec pak.

contact

42gr 1040-1090fps round nose

ELEY contact is a subsonic round which ensures ELEY's outstanding accuracy and reliability in semi-automatic rifles and pistols.

Minimal recoil enables fast follow-up shots while the 42-grain bullet delivers greater power downrange.

Available in a 300 round rec pak.

New for 2018

ELEY tenex air premium air pellets join our range of .22LR ammunition in 2018. World-class accuracy, protective packaging and precise weight control set new standards for .177 calibre air pellets.

ELEY tenex air pellets are manufactured in the UK using the strictest manufacturing and analytical processes to provide world-class accuracy.

Available to batch test at ELEY test ranges for the ultimate performance.

Available in 4.49mm, 4.50mm and 4.51mm diameter to ensure a match with all air rifles and air pistols.

Patented recyclable box - ELEY have developed protective packaging which is compartmentalised, transparent and padded to aid dispensing, travelling, and to minimise damage.
